

GET READY FOR A NEW EVERYDAY

Adapt to new ways of
working fast with better
connectivity and tools

76% of people believe
the challenges their
employer is facing now
will significantly alter their
daily work experiences
in the future.

How do you make sure
you're ready for that?

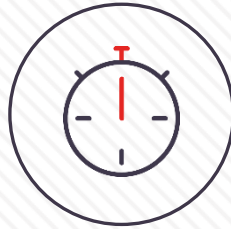

By adopting the tools you need
to enable new ways of working,
empowering your people to collaborate
and serve your customers
wherever they are, on any device,
securely and with ease.

And making sure you have
the connectivity to support
those new technologies.

Are you feeling the pressure...

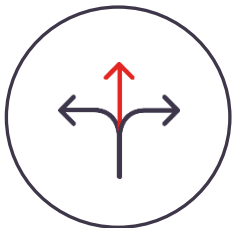

To collaborate better with partners and colleagues from other organisations?

To maintain and improve employee productivity?

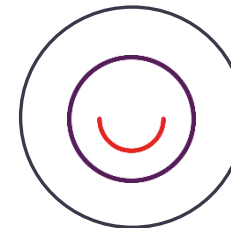

To adapt to new technology with minimal or no in-house IT support?

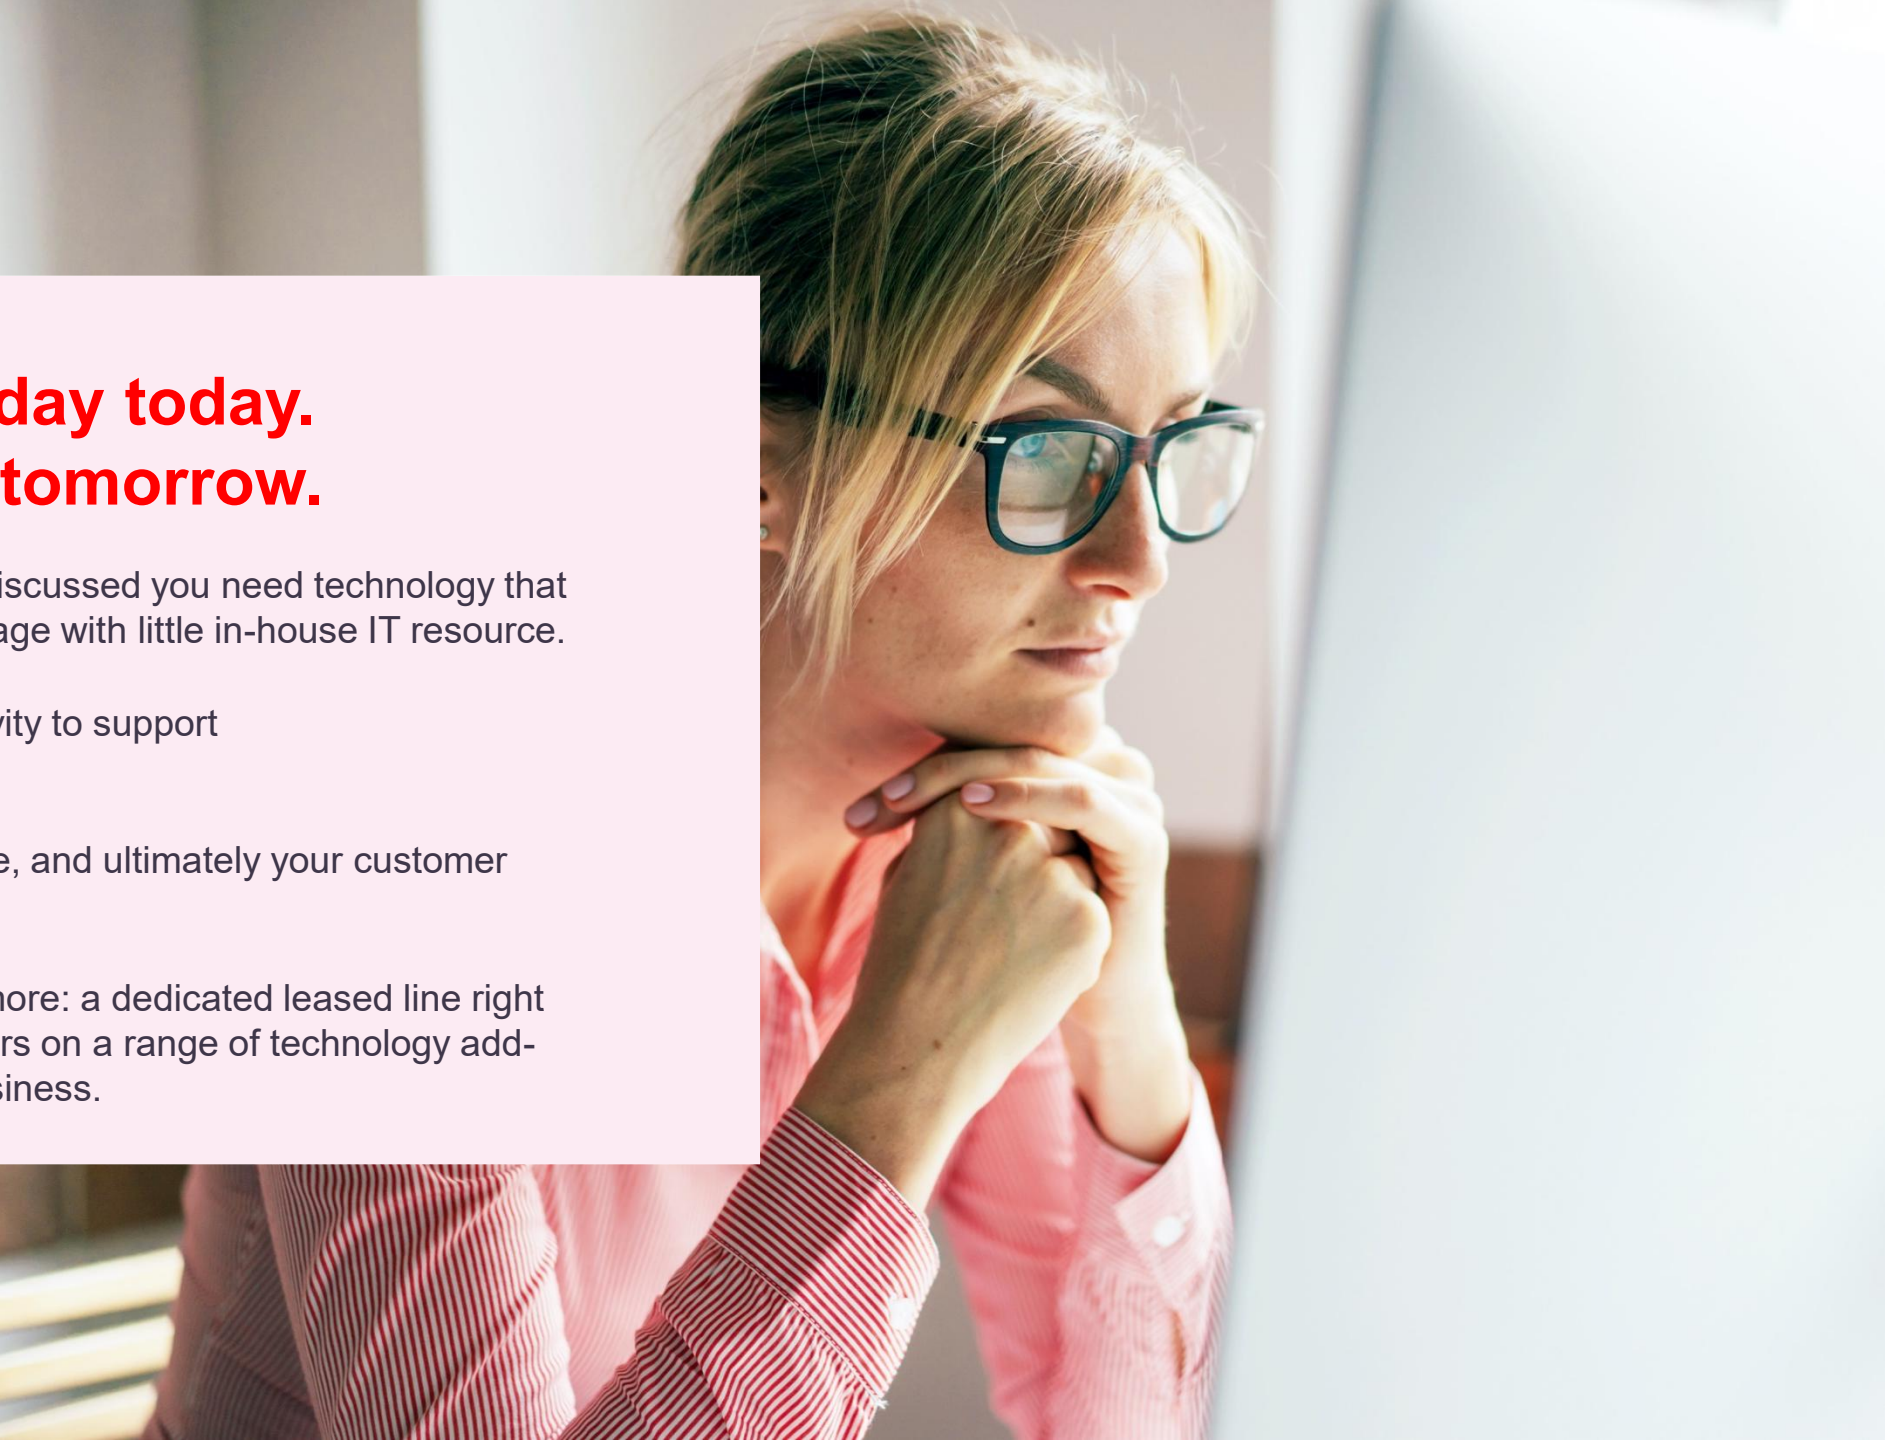

To find new and exciting ways to serve customers through technology?

To secure customer and employee data?

To ensure flexibility in these uncertain times?

Change your everyday today. Get ready to thrive tomorrow.

To overcome the challenges we've discussed you need technology that is effective, secure and easy to manage with little in-house IT resource.

And you need fast, reliable connectivity to support that technology.

Otherwise your employee experience, and ultimately your customer experience, will suffer.

Our DIA plans give you all this and more: a dedicated leased line right into your building, with exclusive offers on a range of technology add-ons that will help you get back to business.

Get more than connectivity with DIA add-ons

Freedom

Let us make life easier for you during these uncertain times, with flexible packages, managed or self-managed plans and multiple contract options.

Flexibility

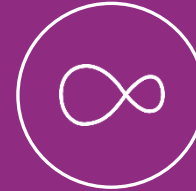

Give your staff and customers internet access wherever they are in the building – or even outside – with dedicated leased lines direct to your building and speeds of up to 1Gbps.

Peace of mind

Protect your staff and customers' data, not to mention your reputation and revenue, with a modern, cloud-based firewall.

Continuity

We constantly monitor your connection to make sure you always have the support you need in the unlikely event of interruption. And you'll have that promise in black and white within your SLA.

Expertise

Get a personal and professional service from day one: our teams working in partnership with yours, trusted advisors to each other.

Freedom

Adapt to the new everyday. Your way

Choose a pre-packaged solution or ask for something completely bespoke, with flexible contract terms and payment plans to suit you.

- Add more technology as your business grows, and let us be your partner throughout that process
- Choose your WiFi with as much or as little support as you need
- Increase your bandwidth whenever you need to

Flexibility

Get your people
connected wherever
they are

Give your staff and customers internet access up to 1Gbps anywhere in your building, or even outside, while empowering new ways of working with add-on technologies.

- Remove the need for fixed desks by enabling staff to connect and communicate anywhere, on any device, paving the way for a more flexible approach to on-site collaboration
- Ensure resilience and support surges in demand, no matter how unpredictable, with an extra DIA line
- Enable new ways of working like virtual customer meetings, remote consultations or face-to-face sessions in larger spaces

Peace of mind

Stop losing sleep over cyber-security

Protect your systems and data at all times with a cloud-based firewall, including a simple dashboard for easy activity monitoring.

- Quickly and easily deploy new security solutions with little-to-no IT expertise, and add new devices in minutes.
- Increase productivity and customer engagement by prioritising and blocking the applications that matter.
- Manage and monitor remotely to protect your organisation from an attack wherever you are.

Continuity

Avoid unhelpful surprises

Get all the technology you need to adapt to life after lockdown in one flexible package, and the right connectivity to support it, with our experts will guide you every step of the way.

- Up to 99.85% service availability, with SLAs covering you in the unlikely event of an interruption
- 24/7 monitoring and management of your DIA connection
- Option for an extra DIA line to give you more resilience and bandwidth

Expertise

Lean on us whenever you need to

Partner with our specialist team to get all the support and advice you need, from planning to implementation and beyond.

- Our Cisco-certified experts will get to know your current setup and what you want to achieve
- They'll recommend the combination of technology add-ons that's right for your organisation
- We'll keep on working closely with you to make sure the technology does everything you need it to, long after the technology has been delivered

Choose from a range of add-ons to help you adapt to new ways of working

Available to all new or existing DIA customers. Collaborate wherever you are, create a more flexible office environment, get peace of mind when it comes to your data and more'
